# DRIVE-CLiQ data transmission cables

Dynamic application

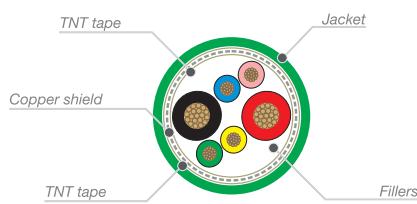

TEKIMA 78100 "DRIVE-CLiQ"

## Use

The DRIVE-CLiQ data communication cable for mobile application is used in connection of industrial equipment. DRIVE-CLiQ is an open encoder interface that allows users to select the right measuring system for their application. With this interface it is possible to connect encoders to magnetic/inductive, magnetostrictive sensors, lasers measuring systems. This cable, made of a polyurethane jacket, grants very good mechanical performance, oil and flame resistance.

Information. An additional UL certified cut-to-length service is carried out on request ("Processed Wire").
